

HXtrade Assistance (TX) | Whitepaper

1. Introduction

HXtrade Assistance (TX) is an AI-powered trading companion designed to empower traders of all levels. The platform provides real-time market signals, automated strategy generation, risk analysis, scenario modeling, and API-based automation. The TX token serves as a utility token to access these AI-driven features, creating a sustainable ecosystem with real-world utility.

2. Problem Statement

Traders often struggle with:

- Analyzing massive market data efficiently
- Generating profitable strategies without bias
- Testing strategies across multiple scenarios
- Automating trades safely and reliably

Current solutions are fragmented, subscription-heavy, and rarely offer AI-driven personalization. HXtrade Assistance addresses these gaps with a single, token-powered platform.

3. Solution

HXtrade Assistance integrates AI models to provide:

1. AI Signal Engine – real-time market alerts based on advanced indicators, sentiment, and liquidity analysis
2. AI Strategy Generator – creates trading strategies tailored to user input parameters (risk, timeframe, target)
3. Backtesting Module – simulates strategies using historical data to estimate performance metrics
4. Scenario Modeling – predicts multiple potential market outcomes
5. Automation API – connects to major exchanges (Binance, OKX, Bybit) for auto-execution of strategies

The TX token unlocks these features via staking, burning, or holding for access tiers.

4. TX Token Utility

Access Tiers:

Tier	Requirement	Features
Free	0 TX	Basic market overview, 1 signal/day
Trader	7,500 TX	AI signals (5/day), risk advice
Pro	25,000 TX	Strategy generation + AI scanner
Alpha	75,000 TX	Backtesting heavy mode + scenario modeling

TX

HX 150,000 TX Full access + API automation
Elite

Burn-to-Redeem Credits:

- 300 TX → 1 AI deep analysis signal
- 600 TX → 1 AI-generated strategy
- 900 TX → 3-year backtesting
- 2,000 TX → scenario modeling
- 5,000 TX → custom AI portfolio

Staking Benefits:

- 20k TX → AI Risk Assistant
- 50k TX → Portfolio Tracking AI
- 100k TX → Auto-trade Signals
- 200k TX → Private AI Models + Live Orderflow

Governance:

TX holders can vote on new AI models, exchange integrations, and feature priorities.

5. Tokenomics

- Type: Utility
- Network: Sui
- Existing Contract: TX Token
- Use of Tokens:
 - Burn-to-redeem AI credits
 - Staking for access
 - Governance voting

Burning TX reduces total circulating supply and increases utility value as adoption grows.

6. Roadmap

Phase	Timeline	Milestones
Phase 1	Q1 2026	TX token deployment on Sui, MVP platform launch with AI Signal Engine & basic strategy generator
Phase 2	Q2 2026	Burn-to-redeem system & staking modules; Pro access tier live
Phase 3	Q3 2026	Scenario modeling, backtesting module, Alpha tier access
Phase 4	Q4 2026	Full API automation, HX Elite tier launch, governance module active
Phase 5	2027	Expansion to additional exchanges & AI model updates, scaling community adoption

7. Use Cases

1. Individual Traders: Get AI-generated signals and strategies for daily trading.
2. Strategy Testing: Backtest strategies to evaluate performance before execution.
3. Automation: Execute trades automatically through API integration.
4. Portfolio Management: AI-assisted risk and portfolio optimization.
5. Governance & Community: Vote for features, models, and priorities.

8. Security & Compliance

- Smart contracts audited for TX token management
- API connections follow best-practice security protocols
- User data anonymized and encrypted
- Sui blockchain ensures transparency, speed, and low fees

9. Conclusion

HXtrade Assistance combines AI, tokenomics, and automation to create a utility-driven ecosystem that simplifies trading for all users. TX token is the key to unlocking AI tools, earning governance influence, and

TX

participating in a sustainable trading community. The platform provides measurable utility, real-world value, and a scalable roadmap for the future.
